Hey all,

So we are getting close to finally wrapping this project up. Augie and I stopped by and wanted to follow up on our findings. Instead of a solid red Cut out, Augie and Randy talked about using this design. We discussed removing "Historic LA waterfront red trolley" and using the version you provided to label them. We will need a male and female version as well as suggested by Randy.

Also we want to incorporate our two logos on the metal cut out trolleys as well.

Let's set up a few minutes to understand how we complete this job, as mentioned you guys have been working with us on this for years, so let's finally pull the trigger :)

Thank you!

Joe

They are double sided, with the windows cut out of the aluminum. I also included graffiti lamination. Please let me know if you want to make any changes to the layout or sign specs. Thank you and have a wonderful weekend!
